⚡ Snapdragon AI Lab Challenge

LocalMind

Privacy-First AI Document Assistant

> 💡 *Local intelligence, zero data leakage, maximum NPU performance.*

Built & Optimized for Snapdragon-Powered HP PCs

🔒 100% Offline | ⚡ NPU-Powered | 📄 Doc-Native

PROBLEM

Why Cloud AI Fails Enterprise Users

Critical Privacy Exposure

Cloud-based AI tools transmit confidential, legal, and enterprise documents to external servers — exposing sensitive data to third-party infrastructure, compliance violations, and potential breaches.

Latency & Connectivity Barriers

Internet-dependent processing creates unacceptable latency for real-time document analysis. Connectivity loss, bandwidth throttling, and round-trip delays cripple mobile productivity.

SOLUTION

How LocalMind Works

Document Input

PDF / DOCX
Local File System

Quantized LLM

Via Qualcomm
AI Hub

Hexagon NPU

Snapdragon
On-Device Inference

🔒 Fully Offline — zero network calls during inference

⚙ Open-source model quantization via Qualcomm AI Hub

🔋 NPU offload maximises battery life & minimises latency

USE CASES

Who Benefits & What Makes It Different

⚖️ Legal & Finance Pros

Query NDAs, contracts & financial reports without cloud exposure.

🔬 Researchers & Academics

Analyze papers, datasets & technical docs fully on-device.

🎓 Students & Educators

Instant Q&A on study material — even offline, on the go.

✦ Key Innovations

🗂️ Document-Native QA

Native PDF & Word parsing — no pre-upload, no third-party OCR.

💾 Low RAM Footprint

Quantized 4-bit models run comfortably within 8 GB RAM profiles.

🖥️ Seamless HP Deploy

Plug-and-play on HP Snapdragon laptops — zero infra setup.

🛡️ Zero Telemetry

No analytics, no licensing calls, no outbound data — ever.

OUTLOOK

Edge-Native Intelligence, Today

🚀 Bringing enterprise-grade document security directly to the edge — fully on-device, fully private, fully ready.

Now

✅ Offline doc QA on HP Snapdragon NPU

Next

🔧 Multi-model support & fine-tuned domain specialists

Future

🌐 Enterprise fleet deployment with policy management
